

# BCS PHCSG Vice Chair Report October 2017

Over the past year I have worked to support our chair John Robinson in his work for the group.

I have deputised for him at the BCS Health Executive when he has been unable to attend.

I have also worked with the technical team at BCS to pilot using G-Suite for nonprofits to support the working of the committee. G-Suite for nonprofits is a free implementation of the Google Suite of apps made available free of charge to charitable sector organisations. I hope that over the coming year we will see full implementation to enable the management of emails, documents and archives to be placed on a footing that is not dependent on individual committee members running and hosting services, and so will give greater continuity and stability to our management processes.
