Read me for Inclusive Design Introductory Presentation

This document suggests what a presenter needs to do before giving the attached: Disability, accessibility, personalisation, inclusion and design presentation.

1. Personalise the introduction page.

2. Either personalise the 'Am I disabled page' or say is he disabled.

3. Read the notes accompanying the slides.

4. The two blank slides: Correct Tabbing and Zoom Text are place holders for the two videos. You may be able to include them in your presentation but I had a problem making that work. You can either add them or play them separately.

5. Look at the Inclusive Design Reference Document, modify if you wish and consider giving it as a hand out at the presentation.

6. If you need more help contact Peter Abrahams (p.abrahams@clara.co.uk)

Good luck
