professional recognition
throughout your career**

RITTech[®]

Professional Registration for IT Technicians (RITTech)

RITTech is a brand new standard for IT Technicians, provided by BCS, the Chartered Institute for IT. As an IT Technician you design, build and maintain the IT world around us but there has previously been no accreditation or standard that allows you to be easily identifiable for the work you do.

RITTech is recognised by employers and recruiters and instantly indicates your level of skills and professionalism, enabling you to really stand out from the crowd.

Can you demonstrate that you:

- have a core understanding of IT
- have technical competence in at least one area that we measure against
- have signed up to a professional code of conduct

The Registration Process

Registration is easy, all you need to do is complete the online assessment and sign up to the professional code of conduct if you are not already part of a recognised professional body.

The assessment takes up to 1 hour to complete but all the information is saved to your account as you go, making it easy for you to do a bit at a time.

Once approved you will be able to download a certificate and be entitled to use the RITTech letters after your name. For example, John Miles RITTech.

Signing up for RITTech is a great way to show that you bring more to the IT industry.

To find out more about the register please visit [bcs.org/rittech](https://www.bcs.org/rittech)
