CREATE TOMORROW'S LEADERS TODAY

Roles and responsibilities

1 On Programme Assessment

Training Provider: In agreement with the employer delivers knowledge, competence and behaviours to the apprentice

Apprentice: carries out work defined by their employer and sits qualifications needed for programme

BCS: provides knowledge modules and professional certification, syllabus, exams and guidance

2 End Programme Assessment

Apprentice: completes synoptic project, attends interview and submits completed portfolio

Employer: provides reference on how apprentice has applied knowledge, competencies and behaviours

Training Provider: manages and invigilates apprentices project in controlled environment (synoptic project)

BCS: bank of projects with guidance on delivery and assessment

Guidance to employer on reference procedure
Guidance on interview procedure and approach

Independent Assessor: grades the apprentice based on synoptic project, portfolio, employer reference and interview

Internal Verification: ensures the consistency of assessment and grading with the Assessment Organisation

Independent Moderation: ensures the consistency of assessment and grading across different Assessment Organisations

3 Reach End Goal

Apprentice: Digital role established and on pathway to qualify for Register of IT Technicians (RITTech)
