

00:57:47 Attendee 2: Has anyone online never used AI?

00:58:34 Attendee 3: Only started playing with it, never used in the real workplace.

00:58:43 Attendee 2: Reacted to "Only started playing..." with 👍

00:58:59 Attendee 2: Playing is a good way to learn whats possible so that's fab.

00:59:12 Attendee 1: We use Co-Pilot at work usually. Used others also

00:59:18 Attendee 2: Reacted to "We use Co-Pilot at w..." with 👍

01:00:22 Attendee 2: A large language model is the same as putting in the local library of books into a database.

01:01:12 Attendee 2: Emergent Ability - let the AI learn from doing. So some systems learn from us working with them.

01:04:06 Attendee 2: I have created Agents in Copilot anyone else created anything?

01:09:35 Attendee 2: RAG - a tailored database to use for conversations e.g. a book or article.

01:14:38 Attendee 2: Love Notebook LM

01:14:51 Attendee 4: Organisational memory : tacit to explicit knowledge

01:15:02 Attendee 2: The podcast is interative as well.

01:25:39 Attendee 1: It would be great to have a list of these tools. I would personally be interest to user test these in my day to day

01:25:56 Attendee 2: Reacted to "It would be great to..." with 👍

01:26:02 Attendee 4: Replying to "It would be great to..." 👍

01:26:13 Attendee 5: Reacted to "It would be great ..." with 👍

01:26:15 Attendee 3: Reacted to "It would be great to..." with 👍

01:26:19 Attendee 6: Reacted to "It would be great to..." with 👍

01:26:36 Attendee 6: Yes the transcription and survey tool sounds very useful

01:26:51 Attendee 3: Give me a good starting point for some of my playing 😊.

01:26:51 Attendee 2: Reacted to "Yes the transcriptio..." with 🏆

01:27:50 Attendee 2: There is a PM newsletter I was recommended to read as student that gives a lot of relevant information about models that might help <https://url.uk.m.mimecastprotect.com/s/3oMlC9r1xszglPAUof5fqwyYi?domain=projectflux.beehiiv.com>.

01:28:07 Attendee 7: Reacted to "It would be great to..." with 👍

01:28:24 Attendee 1: Thanks Iffet

01:28:37 Attendee 2: Reacted to "Thanks Iffet" with 👍

01:28:55 Attendee 3: Reacted to "There is a PM newsle..." with 👍

01:30:49 Attendee 2: I love that idea of a Project Personality.

01:31:36 Attendee 4: Are project managers now redundant?

01:32:36 Attendee 2: Not yet as there is always the need for a human to fact check AI as it is an 'intern' not a true teacher and it will get things wrong. Only as good as the Training (LLM)

01:32:57 Attendee 1: Reacted to "Are project manage..." with 😄

01:33:12 Attendee 4: You get my point, the job will change significantly

01:33:18 Attendee 5: I think AI would quit if it was made to be a project manager 😄

01:33:24 Attendee 2: Reacted to "I think AI would qui..." with 🎉

01:33:30 Attendee 8: is there a danger of feeding AI too much company specific information or project information that may compromise confidentiality

01:33:36 Attendee 4: it doesn't get tired or stressed

01:33:41 Attendee 9: Reacted to "I think AI would qui..." with 🎉

01:34:00 Attendee 2: Reacted to "is there a danger of..." with 🏆

01:34:31 Attendee 2: Replying to "it doesn't get tired..."

Yes it does it runs out of tokens and forgets your first questions lol

01:34:31 Attendee 4: Reacted to "is there a danger of..." with 👍

01:34:58 Attendee 4: Replying to "it doesn't get tired..."

Need a nuclear power station to power it!

01:35:09 Attendee 2: Replying to "is there a danger of..."

That's what Guardrails are used for. We have them very very secure in Pearson for that reason. MFA and cybersecurity are essentials.

01:35:45 Attendee 2: Replying to "it doesn't get tired..."

Isn't Elon trying to get one? Its not carbon neutral or even environmentally good so there is that issue as well.

01:36:31 Attendee 4: Replying to "it doesn't get tired..."

Google is building them

01:36:40 Attendee 2: Reacted to "Google is building t..." with 🙄

01:37:10 Attendee 2: 🤖

01:37:32 Attendee 2: Got two voices please mute one device

01:37:40 Attendee 9: Reacted to "There is a PM newsle..." with 👍

01:37:46 Attendee 1: Thanks Mike. That was a very informative session!

01:48:39 Attendee 2: There is Benchmarking out there that will tell you about relatability and guardrails available. I was told by an expert it is worth paying as its more often secure than the unpaid version which may use your conversations tro train their AI.

01:49:19 Attendee 10: Reacted to "Are project managers..." with 😂

01:49:47 Attendee 2: Huggingface is a sandbox for AI Hugging Face – The AI community building the future..

01:49:51 Attendee 10: Reacted to "I think AI would qui..." with 😂

01:51:16 Attendee 2: What are AI guardrails? | McKinsey

01:53:30 Attendee 7: Reacted to "Huggingface is a san..." with 👍

01:54:20 Attendee 8: Reacted to "What are AI guardrai..." with 👍

01:58:13 Attendee 2: Ohhh I have an issue with describing it as agnostic, it has bias based on what is considered 'normal' by those who create it.

01:58:30      Attendee 8:    Thank you Mike and the organisers

01:58:36      Attendee 2:    Thank you very much very informative.
