Webinars

Buying GPIT what you need to know

Tell us what you think and what you want

NHS

Over the last 20 years, technology has developed so that GP practices are no longer using just a single core IT system, but a core IT system with numerous bolt-ons and interfaces. This is making it ever more complicated for staff to use them efficiently and effectively together, and if something goes wrong, working out who to contact to get it fixed.

We think that a GPIT All Systems National User Group, would make the connections and give you access to a wider group members and expertise.

Please let us know what you think, and if you think it would be a good idea, what you would want from it?
