Introduction

Knowledge of UK data protection law, including the EU General Data Protection Regulation (GDPR) and the UK Data Protection Act 2018, along with an understanding of how they are applied in practice, is important for any organisation processing personal information. The BCS Foundation Certificate in Data Protection 2017 is designed for those who wish to acquire a sound grounding in the key elements of the law and its practical application.

Objectives

The Foundation Certificate is intended to promote an understanding of UK Data Protection law. By obtaining the Foundation Certificate, candidates will:

- Hold a recognised qualification in data protection
- Gain an understanding of the key changes that the GDPR and the Data Protection Act 2018 bring to data protection
- Gain an understanding of individual and organisational responsibilities under the GDPR and the UK Data Protection Act 2018, particularly the need for effective record keeping
- Gain an understanding of the new rights available to data subjects and the implications of those rights with the GDPR and UK Data Protection Act 2018
- Gain an understanding of the increased obligations faced by data controllers and data processors as a result of the GDPR coming into force with the Data Protection Act 2018.
- Be better placed to support their organisation in processing customer data in compliance with the GDPR and the Data Protection Act 2018.

Target Audience

This qualification is primarily aimed at those who need to have an understanding of data protection, and the GDPR in particular, to do their job; or those whose effectiveness in their role would be enhanced by knowledge of the law in this area.

The Foundation Certificate will also provide a stepping stone for those who have, or who will have, some responsibility for data protection within an organisation and who intend in due course to gain the BCS Practitioner Certificate in Data Protection 2017.

This qualification is likely to be of particular benefit to those working in the following areas:

- Data Protection and Privacy
- Information Governance, risk and compliance
- Data Management
- Project Management
- Legal and procurement
- Marketing
- Information Security
- Human Resources

Course format and duration

Candidates can study for this certificate in two ways: by attending training courses provided by accredited training organisations, or by self-study. An accredited training course will require a minimum of 16 hours of study run over a minimum of two days.

The course can be delivered in a number of different ways from traditional classroom-based training to online e-learning.

Eligibility for the examination

This is a foundation level qualification and candidates will not need to have prior knowledge of data protection law (although it would be an advantage). It is strongly recommended that candidates complete an accredited training course, although it is not mandatory.

Format the examination

- 60 minutes 'closed-book', i.e. no materials can be taken into the examination room
- 40 multiple choice questions
- Pass mark is 26/40 (65%)

Additional time

For candidates requiring reasonable adjustments

Please refer to the [reasonable adjustments policy](#) for detailed information on how and when to apply.

For candidates whose language is not the language of the examination

If the examination is taken in a language that is not the candidate's native/official language, candidates are entitled to:

- 25% extra time
- Use their own **paper** language dictionary (whose purpose is translation between the examination language and another national language) during the examination. Electronic versions of dictionaries will **not** be allowed into the examination room.

Guidelines for training providers

It is required that all courses accredited for the BCS Foundation Certificate in Data Protection will provide a minimum of 16 study hours.

Each major subject heading in this syllabus is assigned an allocated time. The purpose of this is two-fold: first, to give both guidance on the relative proportion of time to be allocated to each section of an accredited course and an approximate minimum time for the teaching of each section; second, to guide the proportion of questions in the exam. Accredited Training Providers may spend more time than is indicated and candidates may spend more time again in reading and research. Courses do not have to follow the same order as the syllabus. Courses may be run as a single module or broken down into two or three smaller modules.

Note that specific laws and legal issues relating to the country(ies) within which a training provider operates may be mentioned as examples and included in course material, but the examination will only test the principles.

This syllabus is structured into sections relating to major subject headings and numbered with a single digit section number. Each section is allocated a minimum contact time for presentation.

Use of Calculators

No calculators or mobile technology will be allowed.

Syllabus

For each top-level area of the syllabus a percentage and K level is identified. The percentage is the exam coverage of that area, and K level is the maximum level of knowledge that may be examined for that area.

1. Legal background and positioning (1 hour, 6%, K2)

This topic ensures the candidate is able to demonstrate a basic understanding of the evolution of data protection law in the UK and the relationship with the EU General Data Protection Regulation (GDPR).

1.1 Context of data protection law: The candidate will be able to summarise the revised structure, legal context and wider scope of GDPR and its positioning in relation to the Data Protection Act 2018, including:

1.1.1 EU Directive 2016/680, the Data Protection Law Enforcement Directive (DPLED)

1.1.2 The Privacy and Electronic Communications (EC Directive 2002/58/EC) Regulations 2003

1.1.3 UK Human Rights Act 1998

1.1.4 EU Charter of fundamental rights and freedoms (Article 8)

1.1.5 UK Data Protection Act 2018, Part 2, Chapters 1 to 3

NB: The candidate is expected to have a basic knowledge of the existence of the above and how UK data protection has evolved, but the candidate is not expected to have a detailed knowledge of the provisions.

1.2 The role of the Supervisory Authority (ICO): specifically, the candidate will be expected to be able to identify:

1.2.1 Registration (Notification) scheme

1.2.2 Information Fee (Section 108, Digital Economy Act 2017)

1.2.3 Provision of guidance
