

MENTORING DISCOVER YOUR POTENTIAL

The BCS Career Mentoring Network (CMN) is a robust development and empowerment tool connecting potential mentors with mentees and vice versa. It's a process, driven and controlled entirely by you, for sharing knowledge and experience.

Why should I become a mentor?

The insight and specialist competence you've built up over the course of your career can be hugely valuable to others. You'll find the role extremely rewarding, as you watch your mentee benefit from your mentorship and progress in their career.

Why should I become a mentee?

Your mentor can help you identify goals you may not have thought of, including those that support your steps towards your larger goal. They'll be keen to share knowledge and experience from their own career that helps you reach the next level in yours.

It takes just a few minutes to
create your own CMN account.
