Rules on Robotics

affirmative resolution of 16 February 2017 with recommendations to the  
on Civil Law Rules on Robotics (2015/2183/NL)

1. Parliament,

regard to Article 225 of the Treaty on the Functioning of the European Union,

regard to Council Directive 85/374/EEC,

regard to the study on Ethical Aspects of Cyber-Physical Systems carried out on  
of the Parliament's Science and Technology Options Assessment (STOA) Panel  
led by the Scientific Foresight Unit (STOA), European Parliamentary  
Service,

regard to Rules 46 and 54 of the Rules of Procedure,

regard to the report of the Committee on Legal Affairs and the opinions of the  
Committee on Transport and Tourism, the Committee on Civil Liberties, Justice and  
Human Rights, the Committee on Employment and Social Affairs, the Committee on the  
Environment, Public Health and Food Safety, the Committee on Industry, Research and  
Energy and the Committee on the Internal Market and Consumer Protection (A8-  
0005/2017),

European Commission - Press release

Artificial intelligence: Commission kicks off work on marrying cutting-edge  
technology and ethical standards

Brussels, 9 March 2018

The Commission is setting up a group on artificial intelligence to gather expert input and  
rally a broad alliance of diverse stakeholders.

The expert group will also draw up a proposal for guidelines on AI ethics, building on today's statement by  
the European Group on Ethics in Science and New Technologies.

From better healthcare to safer transport and more sustainable farming, artificial intelligence (AI) can  
bring major benefits to our society and economy. And yet, questions related to the impact of AI on the  
future of work and existing legislation are raised. This calls for a wide, open and inclusive discussion on  
how to use and develop artificial intelligence both successfully and ethically sound.

Commission Vice-President for the Digital Single Market Andrus Ansip said: "Step by step, we are  
setting up the right environment for Europe to make the most of what artificial intelligence can offer.  
Data, supercomputers and bold investment are essential for developing artificial intelligence, along  
with a broad public discussion combined with the respect of ethical principles for its take-up. As always  
with the use of technologies, trust is a must."

# AI definition

- EU AI Communication (April 2018)
  - ‘Artificial intelligence (AI) refers to **systems that display intelligent behaviour** by analysing their environment and taking actions - with some degree of autonomy - to achieve specific goals’
- “As soon as it works, no one calls it AI anymore ...” (Meyer, McCarthy, 2011)
- **General** (broad) AI v **narrow** AI

SHERPA

# What do we mean by “Ethics of AI”?

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 786641

SHERPA

# Existing remedies for specific issues

- Risk management (Clarke)
- Information governance (ISO)
- Development methodologies (e.g. value-sensitive design)
- ICT professionalism, including guidelines
- Product liability (something ICT companies are not used to)
- Data Protection law
- Competition law
- Human rights law

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 786641

SHERPA

# General questions about a digital society

- Human rights in business:
  - CSR;
  - OECD guidelines
- Public engagement
- Representative democracy
- How to deal with the international nature of technology?

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 786641

SHERPA

# Some Observations

- Pervasive technocentric and techno-optimistic view
- What is new, what is specific to AI?
  - Lack of conceptual clarity
  - AI is part of computer science
  - What happened to computer ethics, info ethics, ethics of technology?
- What is the role of ethics, ethical principles?

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 786641

SHERPA

# So What?

- Look beyond the hype
  - What is really new?
  - Which issues can be addressed with existing measures?
- Clarify the role of ethics
  - Ethics / rights / laws
  - Gaps in the law (policy vacuum)
  - Interpretation of the law
- Larger scale / social issues
  - Don't look at AI or big data in isolation
- Is technical innovation subject to democratic oversight?

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 786641

SHERPA
