EXAMINERS' REPORT

Principles of Internet Technologies

Question number: A1
Syllabus area: 3.2
Total marks allocated: 25
Examiners' Guidance Notes
The students here had a good grasp of how to spot errors in the JavaScript code. They were able to identify syntax as well as semantic errors.
Question number: A2
Syllabus area: 3.1, 3.5, 1.2
Total marks allocated: 25
Examiners' Guidance Notes
Overall very well answered. It is encouraging to see students having knowledge of the key aspects in this area.
Question number: A3
Syllabus area: 3.3
Total marks allocated:
Examiners' Guidance Notes
Not as well answered as previous questions in part A. The XML knowledge was broad rather than in-depth. Students would be encouraged to study harder in this area.
Question number: B4
Syllabus area: 2.1
Total marks allocated: 25
Examiners' Guidance Notes
Some excellent display of knowledge here but students need to make sure they know to how to apply it in examples and diagrams.
Question number: B5
Syllabus area: 2.2
Total marks allocated:25
Examiners' Guidance Notes
Not answered as well as other questions in Part B. Students did not demonstrate how to practically apply their knowledge to what was been asked.

Question number: B6
Syllabus area: 4.1, 2.9, 4.4
Total marks allocated: 25
Examiners' Guidance Notes
Students need to make sure what the questions is asking for and not demonstrate general knowledge of the subject area. This is particularly important when it comes to writing questions that require a report.
