

Streamlined CITP route FAQ's

If you became a Professional (MBCS) member on or before **10 October 2022**, you can now follow a streamlined route to CITP registration.

Q. Can the supporter be signed up to a non-UK body?

A. Yes, providing they have a code of conduct/practice

Q. Is there a minimum requirement you need to meet before you apply for Chartership?

A. There are no set pre-requisites, however CITP is broadly at SFIA level 5 and therefore it would be sensible to compare your experience with that level.

Q. How many examples do we have to provide? Can we provide one (a very long engagement) and expound on it?

A. Each question requires one example. As competence is an assessment of consistent performance one example across the entire application would not be sufficient.

Q. Regarding additional documents. What if I am employed in a regulated or security role and I can't share such documents?

A. If you can redact information that cannot be shared, whilst still delivering supporting evidence this could be an option.

Q. How far back can we go with our evidence?

A. IT is a fast-moving industry, so any evidence further back than 3 to 5 years would lack currency.

Q. Can my supporter be a previous manager if I have recently changed companies?

A. Yes

Chartered
IT Professional

Q. My supporter is a professional colleague who is a BCS Fellow. Is this OK?

A. Yes this would be a suitable supporter.

Q. Is there any likelihood to replicate this approach for CEng?

A. No, we are governed by the Engineering Council with regard to the process for CEng.

Q. I don't have a degree, but have 40 years' experience in IT. Is a degree required?

A. No, it is not a requirement.
