**Questions Report:**

<b>A1</b>	
	Majority of the candidates answered this question. Varied scores. Some very vague answers, and some very complex. Better answers were able to differentiate between types of AI.
<b>A2</b>	
	Answered by a good number of candidates. Of those who answered, most provided a sound answer, especially to part a. Part b wasn't as well answered, and those who did, mainly described the various form, even if not in name.
<b>A3</b>	
	Wildly varied answers. Some very good, some struggled to define both Big Data and Data analytics.
<b>B4</b>	
	Very few candidates attempted this question – 7 out of 53. Those that did attempt it generally handled it well.
<b>B5</b>	
	Many candidates attempted this question. Very few picked up near maximum marks in part (a). Most obtained a pass by doing very well on part (b). Many also used repetitive content in both parts.
<b>B6</b>	
	Many delegates attempted this question. As with B5 the majority scored better on part (b)
