

From pillars to practice

Developing a framework for
embedding digital inclusion
in health and social care

Aaron Slater | SCVO
Dr Tara French | DHaC

Digital Inclusion Programme

Digital Health
& Care Scotland

SCVO

**CONNECTING
SCOTLAND**

Digital inclusion is our collective responsibility to ensure that everyone can benefit from being online.

The extent of digital exclusion

Digital health and care strategy

Digital access: People have flexible digital access to information, their own data and services which support their health and wellbeing, wherever they are.

Digital services: Digital options are increasingly available as a choice for people accessing services and staff delivering them.

Digital skills and leadership: Digital skills are seen as core skills for the workforce across the health and care sector.

Pillars for Digital Inclusion

**As someone that's
digitally excluded I
need...**

**As part of the
workforce I
need...**

**As an organisation
or service we
need...**

Digital Health
& Care Scotland

Motivation

As someone that's digitally excluded I need...	As part of the workforce I need...	As an organisation or service we need...
to understand how being online is of benefit or of interest to me	to be mindful of digital inclusion and promote the benefits and opportunities that being online can bring	to prioritise digital inclusion across organisational strategy/policy and promote across all levels of the organisation to create knowledge and awareness

Device

As someone that's digitally excluded I need...	As part of the workforce I need...	As an organisation or service we need...
access to a device in a place I feel safe and that is suitable for my needs so I can do the things I want to do	to work with the person to understand what device would work best for their needs and situation and identify how the device can be provided	to create pathways and networks for the workforce to identify and access appropriate devices for the people they support

Connectivity

As someone that's digitally excluded I need...	As part of the workforce I need...	As an organisation or service we need...
affordable and reliable connectivity in a place I feel safe	reliable connectivity in my place of work and to signpost/offer appropriate connectivity options to the people I support	to ensure reliable connectivity across the organisation and widespread information for signposting options

Skills and confidence

As someone that's digitally excluded I need...	As part of the workforce I need...	As an organisation or service we need...
the skills and confidence to do things for myself and know where to get support if I need it	the skills and confidence in my ability to digitally engage and to support others to be digitally included	to provide opportunities for the workforce to build skills and confidence in using technology and supporting digital access for others including creating safe spaces to explore barriers and fears

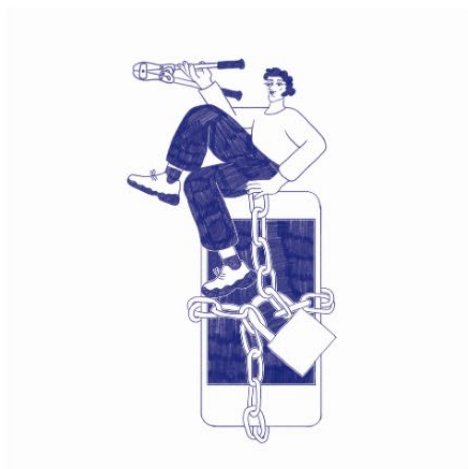

Inclusive design

As someone that's digitally excluded I need...	As part of the workforce I need...	As an organisation or service we need...
platforms and digital services that I can easily access and navigate	platforms and digital services that I can easily access and navigate, and knowledge of a range of trusted digital resources that I can recommend to the people I support	to ensure that the digital resources, services and supports recommended or used by the organisation meet the requirements of inclusive design and any related digital service standards

The Digital Inclusion Programme

Digital Health
& Care Scotland

Designing digital inclusion

'Digital Pioneers'

Models for supporting digital inclusion in mental health and in housing contexts.

'Connecting to care'

Integrating digital inclusion in mental health services and housing/health/social care services.

'Sustain and value'

Embedding digital inclusion across health and social care sectors/organisations - complex public health intervention.

Building capability for digital inclusion

To equip care/service providers with the tools and resources required to effectively embed digital inclusion in core service delivery.
